Simple Explanation of Three Websites

1. Personal Portfolio Website

Purpose: This website introduces a person.

It includes: education, skills, hobbies, projects, achievements, resume, and contact details.

Design: It uses teal, aqua, and white colors. It has simple sections and skill bars.

2. Bakery and Cake Shop Website

Purpose: This website shows cakes and other bakery products.

It includes: cakes, pastries, cookies, prices, special offers, a photo gallery, and a contact form for orders.

Design: It uses cream, brown, and pink colors with pictures of cakes and sweets.

3. Dream Homes Real Estate Website

Purpose: This website helps people find houses and apartments to buy or rent.

It includes: property search, house pictures, prices, locations, property comparison, and contact details.

Design: It uses green, ivory, and white colors with property cards and a comparison table.

Technologies Used

HTML: Creates the structure of the website.

CSS: Adds colors, layout, spacing, and styling.

Conclusion: The portfolio introduces a person, the bakery website displays products, and the Dream Homes website helps people find properties. All three can be made using HTML and CSS.
